

Learn circularity in tech industry from frontrunners

25 April 2022, 02:00

Thomas Vandenhaute

Be inspired by circular frontrunners at 'RE-VALUE - Realizing circularity in the tech industry! Various testimonials and a panel discussion will teach you how other companies are moving towards a circular economy. They will show you that it is more than just recycling. For many products, the reuse, repair, refurbishing, remanufacturing or repurposing offers potential for preserving value and reducing environmental impact. Don't miss these testimonials from the inner circles of the circular economy!

The circular economy is one of the most important game changers for the industry today. It is aimed at long-term and maximum preservation of value of products, components and materials in the economy, while upscaling with minimal environmental and climate impact. New circular business models are a guarantee for innovation in the value chain and the creation of new jobs. Leading companies proactively translate circular opportunities into concrete business cases and often succeed in creating new markets for themselves.

Want to find out what the circular economy can mean for your business? Keen to know how manufacturing companies apply circular strategies to consolidate added value? During this online event, you will discover how pioneers from home and abroad are taking advantage of circular opportunities and learn from their best practices.

Interested in attending the free online event 'RE-VALUE- Realizing circularity in the tech industry' on 31 May (9:00-11:30)? Register now, because the number of participants is limited!
