

Sirris part of international hub about robotics for agile manufacturing

21 January 2019, 15:43

Jan Kempeneers

From 15 to 17 January 2019 Manie Conradie and Pieter Kesteloot, as representatives for Sirris, participated in the kick-off meeting of the DIH2 project on agile production.

Leader of the project is the Technical Research Centre of Finland, VTT Tampere. The DIH2 project is a pan-European network of agile production and robotics. It represents 26 European digital innovation hubs, including Sirris, and aims at reaching more than 300,000 manufacturing industry SMEs. For companies, the DIH2 consortium offers expertise and support for agile production challenges, including technologies, investments, standardisation, know-how and competences, as well as ethics, data and cyber security.

The DIH2 consortium comprises 37 partners, 28 countries, including 26 innovation centres, and 10 companies providing operative expertise. 10 global business sponsors have pledged their support for the project.

Find out more on our DIH2 project webpage.
