On 7 February 2023, holding and clamping technology manufacturer Schunk is organising an event to demonstrate its iTENDO2 process monitoring system, in cooperation with Sirris. All machining enthusiasts welcome!

Next to being a leading company in the world of work holding and clamping technology, Schunk also creates technology solutions for digitalization in metal cutting industry. This event is planned to show case its new iTENDO technology to measure the process stability. With iTENDO's real-time data communication, process optimization is made simpler without traditional trial and error approach.

During the event there will be a short presentation to explain the specifications, features and benefits along with a practical demo for milling application at the site. After the demonstration there will be time to exchange ideas or ask questions over a snack and a drink.

The event will take place at the Sirris site in Diepenbeek on 7 February 2023. There will be two sessions: 11 a.m. to 2 p.m and 4:30 p.m. to 7:30 p.m. Participation for this event is free, but registration is required, as seats are limited. Be sure to confirm your presence by filling in the registration form before 30 January 2023. Do not forget to mention the desired session that you

would like to attend.
